Portfolio Update

U.S. equities were relatively stable in December despite lingering uncertainties about European sovereign debt and the inability of U.S. political leaders to come to an agreement to extend the payroll tax cuts. Economic data continued to be stronger than expected. The S&P 500 Index posted a modest gain, with seven of the 10 sectors advancing, led by telecommunication services, utilities and health care. Investors remain mindful of key risks such as the European debt crisis and whether the U.S. economy needs further fiscal or monetary stimulus. The value of the Canadian dollar increased versus its U.S. counterpart, which had a negative impact on returns in Canadian dollar terms.
